Prepar3D Prepar3D V4 Professional Plus 4.0.23.21468 full license.}\$\$ The form of Eq. (\excited\]) describes the polaron for $N = \pm 1, \pm 2, \dots$ and the free magnon for $N = 0$. This formulation also shows that the polaron-magnon interaction is associated with the dynamic screening (\screening\]), which is verified numerically. The dashed line in Fig. \[fig2\](a) shows the fits to Eq. (\screening\]) for the high-frequency phonon modes. The same type of fits to the spin and charge susceptibilities are also performed. The fitting results at $\omega_0=0.1$ for the excitation gaps are summarized in Fig. f678ea9f9e
