Ramen Download For Pc [Torrent]

CHART RAMEN'S PATH:

Ramen will walk to the first arrow you place first, the second arrow you place second, and so on. Each successive arrow must be closer to the goal than the previous. Once Ramen has reached the last arrow you placed, he will move directly towards the green goal arrow at the end of the map. If Ramen collides with an electric fence, he'll die. Obstacles will slow Ramen's speed to effectively zero and quickly suffocate him because he can't see what he's doing. Only Ramen can collect the rewards dropped by obstacles. Obstacle centers are marked with blue dots. When the boss fight is activated, a new set of electric fences will appear. Be careful not to run Ramen into this new danger. Ramen's path cannot be altered once the action has begun.

Platforms: Once the player lands on a white platform, a 5 second countdown begins. A player standing on a glowing platform will be alerting all flying enemies on the map and significantly boosting their detection range. Flying enemies will still preferentially attack Ramen, if he's within their range.

Jetpack: The jetpack has 10 seconds of accumulated use. When the limit is reached a 40 second cooldown is initiated.

Ammo Crates: Either the player or Ramen can collect the items dropped by ammo crates.

Ramen will exit the mine and enter the valley in 5 minutes. Good Luck!

About This Game

Ramen spends a lot of time considering how best to spend his last productive days. He recently learned that some silent investors for a small pizza restaurant have secretly hidden their tax returns deep in a privately owned local uranium mine. He insisted on revealing the source of their dirty money to the public and it's gotten him into some hot water. He snuck his way inside the mine, found out where they keep the records, and just before he strapped the documents to his back in preparation to leave, he thought "Will this be a worthwhile escape?" He then enthusiastically blindfolded himself for added danger! He didn't know you were coming to help, he barely knows you're there, and he doesn't think he needs you. Your mission, should you choose to accept it, is to guide and protect Ramen during his passage through the dangerous valley. Keep him alive so the truth about those crooks can be brought to light.

In this game, you start with an birds eye view of a map full of obstacles and enemies. You must first chart the path across the playing field that Ramen, the character you are escorting and protecting, will follow once the action starts. Simultaneously, you can purchase ammunition and powerups that will assist you for the successful completion of each stage. Enemies and obstacles are randomly distributed at the start of each match. Every match is unique. Once you click "Ready", you can start to clear enemies from the map. There is a fixed number of enemies that will spawn. It is recommended that you take down each group of enemies using the type of munition that's designed to do the most damage to that enemy type as that will allow you to start the final boss fight with the most firepower at your disposal. The boss is the same character on every map but his behavior is dependent on your play style. If you collect all the hidden folders, clear a sufficient amount of enemies, and get Ramen across the finish line with full health, you will have defeat the game with a perfect score.
